

SPECIALISED EQUIPMENT for SPECIAL PROJECTS

Roger G. Bailey & Associates/DDS have provided contracting services to Municipal Councils, Government Instrumentalities, Land Developers, Consultants & Construction Contractors since 1984.

The special equipment offered in this brochure has been specifically designed/developed/acquired and incorporated into our fleet to cope with some of the more unique situations encountered during the past twenty plus years and is available for hire or contract as well as a quotation/consulting service.

LONG REACH

EXCAVATOR
(60 FOOT/18 METRE BOOM)

DAM CLEANING
LAKE WEEDING
CHANNEL DREDGING
EMBANKMENTS
BATTERS
OUTCROPS
OVERHANGS
WATERWAY IMPROVEMENT

The extended length boom and dipper arm mounted on a 25 tonne excavator enables the machine to work well beyond the limits of a "normal" machine and reaches a height of 10-15 metres above ground. Small (3 tonne) excavators are also available with extended boom for "mini" situations.

'SQUARE' IMPACT

ROLLER
(HEAVIEST ROLLER AVAILABLE)

DEEP LIFT COMPACTION
PROOF ROLLING
LAND RECLAMATION
LANDFILLS
SUBGRADE IMPROVEMENT

The unique square roller is used to proof roll or consolidate loose/uncontrolled fills, where conventional rolling is inadequate. Also used to improve ground impermeability in irrigation or water retention applications. Rural road re-construction as well as pavement or subgrade re-consolidation are other areas where the high speed /deep impact system is used.

'THE VERGER'

(ROAD SHOULDER - CUTTER)

ROAD SHOULDER MAINTENANCE
COMBINED ROAD SIDE CUTTER &
LOADER IN ONE PASS
ADJUSTABLE ANGLE & WIDTH
CLEAN, CONCISE & EFFICIENT

This highly innovative machine removes the dangerous road shoulder build up that causes water ponding and erosion. It simply cuts the roadside verges and loads directly into waiting trucks. It works with the traffic flow and leaves the roadside clean and tidy. Application use, freeways to small rural roads.

SAFE - EFFICIENT - RELIABLE -
COST EFFECTIVE

DIFFICULT DIRT SOLUTIONS
